### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Goulden (4,154,513) discloses a sunbather's eye protector comprising a pair of eye covers of opaque material and a frame supporting eye covers transmitting tanning radiation to the wearer's face for even tanning of the entire face including the area around the eyes. However, the prior art fails to suggest such a frame transmitting tanning radiation apply to sunglasses. It is agreed with the applicant that "Frank addresses the problem of conventional sunglasses in that they create untanned lines or streaks on the wearer's face..." Frank does not solve this problem but merely mentions it in his Background of the Invention. Since the Frank case was issued in 1979 this demonstrates the "long felt need" for the instant invention" as argued. The prior art fails to teach a combination of all the limitations as claimed in the independent claim 26, wherein the claimed invention comprising sunglasses comprising two lenses one for each of the left and right eye which lenses are secured each to a right and left frame element which frame elements are each secured to a right and left bow for securement to a wearer's ear which left and right bows are each at least partly transmissive to a predetermined wavelength of light and which bows are more transmissive to this predetermined wavelength of light than are the two lenses, as claimed. The prior art does not disclose or fairly suggest, by themselves or in combining with any other reference, to meet a combination of all the limitations as claimed in claims 26,30,31. Therefore claims 26-34 could be allowable over the prior art of record.
